API & Database: REST API, Swagger, JSON, FastAPI, SQL, PostgreSQL

Programming & Tools: Python, TypeScript, Git, GitHub, GitHub Actions, VS Code, Jira, Excel

Professional Experience

SBI CAP Securities **Jan 2024 – May 2025**

Relationship Manager (Trading Platform Beta Testing & QA Validation) *Pune, Maharashtra*

- Performed exploratory, functional and UI validation of the beta trading application by executing complete user workflows across key modules and reporting defects to the testing team.
- Performed functional and smoke checks across Login, Holdings, Portfolio, Funds, Reports and Watchlist modules before production rollout.
- Reproduced defects, verified fixes, performed regression checks, and coordinated with Product, Operations and Technology teams.

Angel One Ltd. **Jun 2021 – Sep 2023**

Associate (Customer Experience & Trading Platform Beta Validation) *Mumbai, Maharashtra*

- Performed exploratory and end-to-end validation of beta Android, iOS and Web applications by executing complete user workflows and identifying functional and UI issues.
- Selected among approximately 20 employees across India to participate in beta validation of the migrated trading platform.
- Identified defects, documented observations in Jira, reproduced customer-reported issues, and performed regression testing after fixes.

Projects

QA Book **2025 – Present**

AI-Powered QA Management Platform – QA Automation Project

- Performed functional, UI, API, integration and end-to-end testing across requirements, test cases, execution, defects, dashboards and reporting workflows.
- Developed and executed **Tosca automation** practice scenarios using reusable modules, TestCase Design, ActionModes, dynamic test data, buffers, recovery/cleanup and execution management.
- Developed **Playwright** UI automation using TypeScript to validate critical workflows, navigation, forms, validations and frontend-backend interactions.
- Performed **REST API testing** using Swagger, validating request/response behavior, data flow and frontend-backend integration; built the platform using React, TypeScript, FastAPI and PostgreSQL.
