PROFESSIONAL SUMMARY

Business Analysis and Software Testing professional with 4+ years of BFSI experience, selected among approximately 20 employees nationally for trading platform beta validation. Skilled in functional/UI testing, defect management, CRM workflows and QA documentation; transitioning into Software Quality Assurance.

PROFESSIONAL EXPERIENCE

SBI CAP Securities

Jan 2024 – May 2025

Relationship Manager (Trading Platform Beta Testing & QA Validation)

Pune, Maharashtra

- Participated in beta validation of the SBI Securities trading application before production rollout.
- Performed Functional, UI and Smoke Testing across Login, Holdings, Portfolio, Funds, Reports and Watchlist modules.
- Reproduced reported defects, verified fixes and coordinated with Product, Operations and Technology teams.
- Used internal CRM system for customer servicing, issue tracking and resolution across Equity, Mutual Funds, IPOs and Demat services.

Angel One Ltd.

June 2021 – Sep 2023

Associate – Customer Experience (Beta Validation – Trading Platform)

Mumbai, Maharashtra

- Selected among approximately 20 employees across India to participate in beta validation of the migrated trading platform.
- Executed Functional, UI and end-to-end validation across Android, iOS and Web applications.
- Identified defects, documented observations in Jira and performed regression testing after fixes.
- Used Salesforce CRM for customer workflow management and issue resolution.
- Collaborated with Product and Technology teams during production releases.

PROJECTS

QA Book

2025 – Present

AI-Powered QA Management Platform

- Conceived and developed a full-stack QA management platform covering projects, requirements, test scenarios, test cases, test suites, test runs, execution tracking, defects, dashboards, and reporting.
- Implemented BRD document management with DOCX/PDF upload, document extraction, S3-compatible object storage, download, deletion, and AI-assisted requirement generation using Google Gemini.
- Designed end-to-end traceability across **Requirements** → **Scenarios** → **Test Cases** → **Test Suites** → **Test Runs** → **Execution** → **Defects**, supporting structured QA coverage and validation.
- Built REST APIs using FastAPI, SQLAlchemy, Pydantic, and Alembic following a layered API, service, repository, and database architecture.
- Developed responsive React and TypeScript interfaces with reusable forms, dialogs, tables, validation, error handling, and frontend-to-backend API integration.
- Implemented GitHub Actions CI to validate backend application initialization and frontend production builds on pushes and pull requests, and deployed the platform using Vercel, Render, and Neon PostgreSQL.
- Performed functional, UI, integration, and end-to-end workflow testing across BRD processing, AI-generated requirements, traceability, test management, execution, and frontend-backend integration.

TECHNICAL SKILLS

Testing: Manual Testing, Functional Testing, Regression Testing, Smoke Testing, Sanity Testing, UI Testing, UAT, Beta Testing, Black Box Testing

QA Documentation: BRD, Requirement Analysis, SRS, Test Plan, Test Scenarios, Test Cases, RTM, Defect Reports, Test Summary Reports
